VERSION INFORMATION

Drobo Dashboard: Version 2.6.1 [69101]

KEY HIGHLIGHTS

This is a new release of Drobo Dashboard for Mac and Windows. Key highlights for this release are:

- This release is to be used with the Drobo 3rd Generation, Drobo 5D and Drobo Mini.
- Fixed: When shutting down the Drobo via Drobo Dashboard and the Backup Volume is encrypted using Mac OS X FileVault, an error “Disk Not Ejected Properly” may be displayed.
- Fixed: kUIString message is displayed when the host language is set to German.

Drobo 5D and Drobo Mini

- Drobo 5D and Drobo Mini firmware 3.1.1 and above is to be used with this version of Drobo Dashboard.
- Added support for Performance Load.
- Added the ability to create a new volume called the Backup Volume, which is to better support backup applications such as Mac OS X Time Machine and Microsoft Windows Backup and Restore.
- Added support for Mac OS X FileVault and Microsoft Windows BitLocker, when using the new Backup Volume.
- Added support for Apple’s OS X PCI Pause for Thunderbolt connected devices.

KNOWN ISSUES

General Issues

None

BEST PRACTICES

In accordance with industry best practices, you should always backup your data before any firmware upgrade. For more information, please visit drobo.com/support

Make sure that you keep all software up to date. This includes Drobo Dashboard, which as of this writing the latest release is 2.6.
